

Model:	STEREO 230
Version:	V1.20
Issue date:	13 th February 2023
Type:	Public

New Features

-

Fixes

- Improved performance when entering and coming out of standby via CEC commands from a TV (ARC input).

Additional information

To perform the update, place the "LEAK.bin" upgrade file in the root of a FAT32 formatted USB key.

With the LEAK Stereo 230 switched off at the mains, insert the USB key into the "Update" port.

Press and hold the standby button while switching on at the mains.

The LEAK Stereo 230 will update, and the input source LED's will light quickly in sequence. Release the standby button.

The update will take a few seconds

The LEAK Stereo 230 will put itself into standby once complete.
